

Covid-19 | What you need to know

Progressive Building Maintenance is a **full-service janitorial cleaning company** with 19 years of experience making us knowledgeable and conscientious. We understand the importance of our role. A clean, well-maintained facility speaks volumes about your image. Today sanitation concerns are on everyone's mind. It affects everyone. Progressive Building Maintenance isn't just cleaning your facility

we are directly affecting the positive, productive atmosphere. At Progressive Building Maintenance the health and safety of our entire community is our top priority. We understand the growing concern surrounding coronavirus (COVID-19) across our communities, and our hearts go out to all those who've been impacted.

The need is here...

And we have the means to provide you with the service to help stop the spread and

prevent illnesses, now is the time to take steps in preventing the spread of the COVID-19 virus in your facilities. This situation continues to evolve quickly, based on current guidance and our own standards and practices, we have been providing a professional preventative program that implements **sanitation and disinfecting protocols** that will ensure you're operating safely with minimal disruption to your day in and day out routines.

The Professional Preventative Program offers 2 options:

1. Electrostatic disinfection treatment to your entire facility, all high traffic touch point surfaces. This will include desktops, doorknobs, horizontal surfaces etc (treatment remains for 1 week).
2. Disinfection of all touch points daily with TB-Cide Quat (treatment remains for 24 hours).

We use **hospital grade** virucidal disinfectants for these procedures.

A time to give you a quote can be scheduled at your earliest convenience. Please understand the needs to be proactive is now, so we should put a plan in place ASAP.

For the latest information on the precautions you can take, please visit the CDC's website.
